

How does Rural Addressing work?

Rural addresses are based on the location of the primary access to a residence or business along a road allowance. Each mile of road is divided into intervals of 40 metres, with numbers increasing from South to north and East to West. Even number addresses are placed along the North and West sides of a road allowance and odd number addresses are placed along the South and East side of a road allowance.

Reference the road to the east if the Primary Access is off a Township Road or to the south if the Primary Access is off a Range Road. For the purposes of addressing, virtual township roads exist between all sections, whether an actual road allowance exists or not.

Example #1: 643008 RGE RD 213 – The access is along the West side of RGE RD 213. It is located in address interval 8. 643 is the intersecting TWP RD number to the South.

Example #2: 213033 TWP RD 644 – When there are multiple accesses, the primary access is used. In this case, the access is along the South side of TWP RD 644. 213 is the intersecting RGE RD to the East, and 33 is the interval the primary access is in.

Example #3: 643032 RGE RD 213 – When there are multiple accesses along the same side of a road allowance, the primary access, interval 32, is determined.

Example #4: 643072 RGE RD 213 – When there is one access along a TWP RD, one access along a RGE RD, and no clear primary access, the access along the RGE RD is typically chosen.

Example #5: 643009A & 643009B RGE RD 214 – When there are multiple residences located off the same primary access, the first building off the access is designated "A", the second building is designated "B", and so forth.

Example #6: 643047(5, 12, 16 & 21) RGE RD 214 – Subdivision addresses are also based on the location of the primary access on a road allowance. Each parcel within a subdivision will be assigned a unique number. The lots are numbered clockwise using an increment of 4, with odd numbers along the East and South, and even along the West and North. The lot number is to be used along with the six-digit rural address for your full address.
